

DYLON ALUMINUM ANTI-SEIZE

DESCRIPTION:

Dylon Aluminum Anti-Seize is a new development for the die-casting industry. This unique product imparts a highly lubricious coating on the die surface to prevent molten metal stickers without wax or silicone. **Aluminum Anti-Seize** is an excellent lubricant for start-up when the dies are still cold. **Aluminum Anti-Seize** will not react with, nor be wetted by, molten aluminum. **Aluminum Anti-Seize** is a proprietary blend of lubricants, extreme pressure additives, and release agents in a non-petroleum based carrier. This exceptional product also has excellent anti-solder properties.

CHARACTERISTICS:

Solids:	53.1%	Color:	Silver
Cone penetration:	293	Consistency:	Paste
Odor:	None	Silicone:	None

APPLICATION:

Aluminum Anti-Seize has the consistency of a paste but it is easily brushed onto die surfaces. **Aluminum Anti-Seize** can be diluted with any suitable non-petroleum based light oil. A good starting dilution would be 1 part **Aluminum Anti-Seize** with ½ part light oil.

PACKAGING:

1 gallon pails

5 gallon pails
